

## **ACQ DATAWAREHOUSE**

<http://acqdata.navfac.navy.mil>

Through the Performance Measurement and Assistance Program (PMAP), NAVFAC contracting activities have been encouraged to network with each other, sharing best practices as well as lessons learned. By leveraging technology, the ACQ Datawarehouse website has been developed that will allow (limited) access to information regarding NAVFAC's three-year schedule of PMAP On-Site Visits (OSVs) at NAVFAC contracting activities, resultant activity performance measurement reports, as well as results of the annual PMAP Survey.

PMAP Program Managers will be able to access the website to populate and maintain information on survey participants that will be used for each year's annual PMAP Survey, edit their EFD/A's 3-Year OSV schedule, and upload PMAP OSV Reports and activity Quality Management Plans (QMPs).

Activity contracts managers will be able to establish a user name and password to login to the Reports Section of the website to view the status of scheduled PMAP OSVs, activity performance measurement reports, and responses to surveys from activity managers on effectiveness of the OSV process.

The Survey Archives section of the website allows unrestricted access to NAVFAC associates, clients and managers of results of NAVFAC's annual PMAP Survey.

Activity contracts managers are encouraged use the information provided through the ACQ Datawarehouse to network with other organizations in order to share best practices and lessons learned.
